

AutoCare AI Medical Report

Generated on: 05 February 2026, 00:04

DIABETES Risk Assessment

Risk Probability: 26.19%

Risk Category: Moderate

Model Used: GradientBoostingClassifier

Based on the submitted health indicators, the AI system estimates a Moderate risk level for diabetes. This prediction considers age group, lifestyle factors, metabolic indicators, and cardiovascular stress markers. This report is computer-generated and should not replace professional medical consultation.

HEART Risk Assessment

Risk Probability: 58.33%

Risk Category: High

Model Used: RandomForestClassifier

Based on the submitted health indicators, the AI system estimates a High risk level for heart. This prediction considers age group, lifestyle factors, metabolic indicators, and cardiovascular stress markers. This report is computer-generated and should not replace professional medical consultation.

STROKE Risk Assessment

Risk Probability: 7.0%

Risk Category: Low

Model Used: RandomForestClassifier

Based on the submitted health indicators, the AI system estimates a Low risk level for stroke. This prediction considers age group, lifestyle factors, metabolic indicators, and cardiovascular stress markers. This report is computer-generated and should not replace professional medical consultation.
